

CloudCheckr CMx

Infrastructure with insights. Immediate results.
Cloud management reimaged.

CloudCheckr CMx™ is next-generation cloud management featuring a new experience for delivering total visibility into your infrastructure—and your organization. By unifying cloud data from sources all over the enterprise, your business achieves immediate and actionable insights on how to run and scale public cloud infrastructure. CloudCheckr CMx is the only cloud insights solution with the flexibility to meet business requirements at scale.

How CloudCheckr CMx Delivers Cloud Governance

The most complex cloud infrastructures are made easy to manage, and govern, with CloudCheckr CMx. Gaining total visibility into your multi-cloud and hybrid cloud environment, enables your team to manage cost, invoicing, security, and compliance to scale cloud usage with confidence.

Cost Management

Make the most of your cloud spend while staying within budget.

- Identify idle, unused, and underutilized resources based on your custom parameters
- Optimize your spend with automated right sizing
- Mine up to 6 months of data to create highly accurate Reserved Instance (RI) purchase recommendations

Invoicing

Allocate cloud charges according to your business requirements.

- Automated invoicing for chargeback or showback
- Powerful re-rating, with custom charges for resellers and service providers
- Arbitrage tools, such as RI unsharing and AWS Savings Plan deallocation

Security and Compliance

Ensure compliance and prevent misconfigurations that lead to costly security breaches.

- 600+ best practice checks to instantly identify misconfigurations and vulnerabilities, many with self-healing automation
- Get alerted by email, SNS, PagerDuty, Jira, Slack, ServiceNow, or automatically trigger a Lambda function
- Score compliance with up to 35 distinct regulatory and industry standards from CIS, PCI-DSS, HIPAA, NIST, SOC2, ISO, and more
- Audit-friendly, with up to seven years of read-only records to prove compliance at any point in time

Take Control of Your Cloud Environment

Total Visibility

Manage your entire cloud infrastructure in one place. With CloudCheckr CMx, manage multiple accounts, across multiple clouds, and harness the agility of the cloud while maintaining full control and oversight of costs, resources, and security. A robust and complete API allows technology teams to build integrations with other systems, so you can easily include cloud insights into your business processes.

Start Fast, Immediate Results

Our flexible architecture makes onboarding easy—with results in days. You quickly gain control of cloud spend across the organization with a centralized, automated structure for cost management.

Unrivaled Security & Compliance

Secure, manage, and govern the most sensitive environments in the world. CloudCheckr CMx continuously monitors your cloud infrastructure, ensuring complete audit preparedness. You can actively address issues with a prioritized list of security best practice checks and automated fixes.

Schedule a demo of CloudCheckr CMx, the next-generation platform for cloud management, and learn how your organization can achieve immediate and actionable insights about your public cloud.
